## OBJECTIVE

Front-end web development position to which I can contribute as a quick-thinking, fast-learning, and creative developer.

## EDUCATION

### Epicodus | CSS/JavaScript/Design Track

2016

Developed & designed 80+ responsive, mobile-first applications and webpages in solo, group, and pair projects using:

- Angular2 and Ember frameworks
- SCSS
- Sketch
- TypeScript
- Behavior-driven and Test-driven JavaScript development with Mocha and Chai
- Google Maps, Weather, GitHub, and YouTube APIs
- Version control with Git
- Build automation with Gulp
- jQuery, Materialize, Bourbon Neat, Bootstrap, Greensock, and Foundation libraries
- Invision prototypes
- UX strategies including user testing, personas, stories, and flows

### St. John's College Santa Fe | Great Books Program

2011 - 2012

Studied Ancient Greek, Philosophy, Music theory, Euclid's Elements, and the foundations of modern Science.

## EXPERIENCE

### Graybox | Web Development Intern

2016

Provided front- and back-end support for GrayBox's 60+ clients utilizing ExpressionEngine, Angular 1, and Wordpress. Projects included:

- Streamlined production of sales proposals by styling custom PandaDoc template sectioned into modular content blocks.
- Optimized user experience across viewport widths on new Graybox site by adding styling to carousels.
- Reduce visual clutter on new Graybox site by adding PHP logic to filter ExpressionEngine channel.
- Ensure best practices on back-end team by writing internal guide for setting up SSL on AWS EC2 and NGINX servers.

### Front-End Developer & Designer

2016 – Present

Design and develop websites for artists and arts institutions.

- Designed and built Wordpress portfolio theme using custom fields, post types, and animated interactions with JavaScript.
- Recovered and rebuilt PHP site for New York gallery from Wayback Machine archive.
- Created interactive web experience using jQuery and CSS animations for project in Finland.
